## INTRODUCTIONS

### CARROUSEL

Many who visited us last summer were impressed with this flashing, gay flower. It is the kind you can spot across the garden. Because of the gay colors, we named it CARROUSEL. This 8-inch bloom has broad petals of deep gold with garnet extending up each petal and sepal to form a wide splash of red. It has a greenish yellow throat. Early mid-season bloomer that repeats and does not fade.

Semi-evergreen, height 32" \$10.00

### MELLOW MOONLIGHT

We carefully watched this daylily through two blooming periods last summer. It is our belief that this is a top grade Hem. The very large, beautifully formed soft yellow blooms appear as the night comes on and stays perfectly fresh and crisp all next day, and well into the next night. With excellent branching, this assures blooms at all times. As the entire bloom is one color, we will call it a self. Sun resistant, medium height, evergreen.

(September delivery) \$20.00

### WESTWEGO

This full, round, medium-large, 6-inch bloom is a golden chrome with a perfectly formed broad burgandy triangle above a cool green throat. It has broad overlapping ruffled petals. The colors of golden chrome, burgandy and green form a beautiful flower. It is the cleanest eyed variety that we have seen. A mid-season bloomer that continues all summer.

Sunproof, evergreen, 34" \$8.00
